

VISION

“A model company in empowering communities by providing world-class pipes and services for a progressive and highly competitive pipe industry.”

MISSION

To provide adequate working resources and standard processes that will consistently produce world-class products and services that will meet and exceed customers' satisfaction.

To continually research, introduce and practice technological innovations that will respond to the needs of community as a whole.

To conduct continuous trainings and seminars that will foster teamwork and encourage employees to be highly productive and competitive, allowing them to grow personally and professionally.

To comply and adhere to all applicable legal requirements.

To deliver equitable returns to our stakeholders and on time payment of obligations to our creditors with integrity, fairness, confidentiality and professionalism.

To be responsible and responsive to the challenges and needs of the society today in maintaining and providing a safe and conducive environment for living.

Pipeworld Industries, Inc. is a Mindanao Manufacturer of High Quality uPVC pipe series. Widely distributed in the whole Mindanao, the company formation is the region's pioneer producer of high graded pipe products. Its introduction to hardware stores, land and high rise building developers and electrical supply stores opens the gate of highly reliable supplies of uPVC pipes. Aside from a customer service-based management, giving the best value for its business partners' money is a spectrum established by the organization.

Founded in April 15, 2016 through the remarkable effort and collective skills of various, seasoned individuals from the different field of uPVC domain.
